Public artwork: Mountain Creek State High School  
Todd, Kevin

Research Background

Field: Visual art /public art.

Context: To work with students to make a mural/artwork for a new school building.

Research Question: Could and art project be used to create a sense of place for high school students and to teach them new skills?

Research Contribution

Innovation: The project involved students in the creation of public art and allowed them to work with digital technologies and local industry.

New Knowledge: The project contributed to new knowledge regarding the involvement of students in public art.

Research Significance

Evidence of Excellence: The project received funding from Education Queensland and the artwork is on permanent display at the school.
